

## **Blue Collar 2017**

**Power:** 9v battery or power supply not to exceed 200ma

Battery access is through bottom plate

**Power Adapter:** Positive ring/negative center when using a battery, unplug the input when not in use to extend battery life.

**Menatone only recommends Voodoo Labs power supplies. Use others at your own risk.**

### **Controls:**

**drive:** adjusts the level of distortion

**level:** if I have to explain this you have larger problems than this pedal can fix.

**pres:** this controls the level of distortion in the “pick attack” frequencies.

**tone:** turn up to boost upper mids, down to lower treble response

As with all Menatone products there are no right or wrong settings. Play around with the controls to find your own tone.
