

Dirty Blonde

power:

9v - 18v power supply - No Battery

power supply:

NOT TO EXCEED 18V

Negative center/Positive ring.

Please use high quality isolated power supply

controls:

gain: preamp gain

soul: power amp style gain

vol: overall volume of pedal

treb: treble - works the same as a tweed tone

mid: blackface style mid from noon to zero -
flattens mid scoop from noon to full

bass: bass cut when turned down

pres: boosts pick attack frequencies

sag: turn up for a more compressed vintage tone

internal trim pot

extra treble cut to help match pedal to amp

the Dirty Blonde has a lot of gain,
it could oscillate at higher gain levels

Thank you for your purchase
